### Classroom Volunteers

#### How It Works

The Growing Chefs! program begins every March.

Volunteer chefs and community members are put into teams of three.

With your team, you will attend a Volunteer Orientation Session, where you learn basic classroom management skills and review the Growing Chefs! curriculum.

## **Classroom Visits**

You and your team are paired with an elementary school classroom. You visit your class every three weeks over the course of three and a half months, for a total of four visits.

As you mentor the students and help them to grow their own indoor vegetable gardens, you lead the class through a series of lessons.

The lessons are clearly laid out and outlined in the Growing Chefs! Classroom Guide that you receive at your Orientation Session.

To view a sample lesson plan, return to appetizer menu.
